Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in November. Risk assets across equities and credit, including higher beta classes, were buoyed by the outcome of the US election, strong economic data and further monetary easing. European structured credit had a strong month, supported by strong technicals and an improved macroeconomic sentiment. Broad-based gains resulted from spread tightening and carry. Mezzanine tranches of the capital structure performed especially well. US structured credit saw significantly subdued supply, as many issuers preferred to meet their funding needs prior to the election. However, demand remained elevated. AAA rated spreads tightened by 5-10 bp and BBB rated spreads by 20-25 bp. We reinvested capital in short-dated asset-backed securities (ABS) in Australia and short mezzanine profiles in Europe, to take advantage of flat term and capital structures. We took Project Corde, backed by Australian small and medium-sized enterprise ABS, to the Credit Committee.
