Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 1-month SONIA (previously 3-Month GBP LIBOR until 1st January 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in December, ending with a running yield of 67 bp ahead of one-month SONIA and an average rating of AAA. Risk assets sold off sharply on concerns around monetary policy. European credit had a quiet month. We anticipate that supply will be robust in 2025, driven by collateralised loan obligations, residential mortgage-backed securities, the Australian market, and the solar power and data centre sectors. US structured credit saw subdued supply but grew 23% year on year. Over the month, spreads were flat to 5 bp wider, ending the year 15-30 bps tighter on senior paper and 40-100 bp tighter on mezzanine asset-backed securities. In the near term, US structured credit should benefit from higher underwriting standards, robust economic growth, strong technicals and attractive relative value. The Fund reduced exposure to positions with longer weighted average lives and realised profit on positions that had rallied extensively.
